Rt-ac68u forgot password

In order to reset the ASUS RT-AC68U to its factory settings 1. Find the reset button on the rear of the router 2. Press and hold the button for more than 5 seconds The default factory settings are: Default username: admin Default password: admin Enable DHCP: Yes Default IP address: 192.168.1.1 Default subnet mask: 255.255.255.0 Default DNS server: 192.168.1.1 Default SSID: ASUS Are you looking for a simple guide to Change Password on Asus RT-AC68U? You are on the right page. Most of the times, router users forget the login details for the device. In such a case, they look for scenarios, where they try to hit and try the login information. Get quick help with the help of this answer. Steps to Change Password on Asus RT-AC68U Firstly, open any installed browser on your laptop or system. Now, using an internet browser, try to access the router's browser-based utility. Through this admin console you will be able to access and configure the settings of your router. In the address bar of the web browser, type and enter , , or to access the router's web console. This IP varies depending on the individual configuration of routers. Next, log into this browser-based utility. Enter the default username as "admin" and the default password is "admin". Under the WAN menu and then inside Advanced tab, enter into the Settings on the left hand side. Under the WAN DNS setting tab, enter 208.67.220.220 and 208.67.222.222 into the fields "DNS Server 1 and DNS Server 2 respectively. Now, check and confirm whether your LAN DNS server is set or not. Remember, not to configure the settings of Open DNS here. Lastly, you can check your router settings from here and change password on Asus RT-AC68U. Note: As per the reports, router doesn't provides an inbuilt security function called "AiProtection - Network Protection." If this feature was enabled then this might cause OpenDNS to not function. What is Default Login Password for ASUS RT-AC68U If you are owning ASUS RT-AC68U, you must know the default login credentials (username and password) about your router and how to reset the login information in case you have forgotten the RT-AC68U password. Default RT-AC68U Login Password When you have a username and password, then you can easily access the ASUS RT-AC68U web manager using any installed browser. Just use the correct IP login address. Remember to make use of ethernet connection while you are logging into the web interface of your router to change password on Asus RT-AC68U. This way you can make sure that all the configuration settings are put into their place and no important data or files are lost. If the default login IP address you already have doesn't works then consider going for a hard factory reset so that you can configure your router from scratch. Default Login Information (Username and admin password) Default IP login address: 192.168.1.1 Default Username: admin Default Password: admin Resetting Password Consider that you have made the changes in the username and password of RT-AC68U. After that you have forgotten it. Sometimes, the default login combination is not working and you get an access denied message in that case. Simply do a hard factory reset and restore the original defaults for the router. For doing the hard reset, press and hold down the white reset button given on the back side of the router. You can use a pen or pointing element for at least 30 seconds and this resets to default. Change Password on Asus RT-AC68U Usually, it is recommended to change the default login username and password for your RT-AC68U. With default login details, your router can not be protected against unauthorized entries or edits to your modem. So, Change Password on Asus RT-AC68U to modify the factory default login settings. Simply go to the admin console screen and change your login combination. Next, select Security option under Status tab and pull down the drop down box to either change the username or the password. Please make note that you will require the existing login information to make any kind of modifications. However, once after executing the factory reset operation, your default RT-AC68U username and password combination becomes (admin/admin). Troubleshooting IP Connection Issues Whenever you cannot access the web manager of your RT-AC68U, use the default IP address. This directly indicates that the "default gateway" or router's IP address has been changed before. As per the chances, someone has changed the router's default settings which includes the IP address or password. You can find the default gateway using "Command Prompt" by typing "ipconfig" as one of the commands to find out the existing IP address and then login into the router. Remember that factory reset will delete the RT-AC68U into its default IP address, username and passwords. Here you find how to configure and reset Asus RT-AC68U Router. To connect to your router's web interface, follow these steps: Turn on router Establish a connection between the device and the router via network cable or Wi-Fi* Open browser Enter URL or IP address in the address bar and confirm with 'Enter' key Enter username and password in the open user interface and confirm again To reset the Asus RT-AC68U to its default settings, you have to do the following steps: Turn on router For at least 5 seconds, press the Reset button Restart of the device is automatically executed Router has been reset to factory settings The unit will reboot automatically. Once the power light stops blinking, the unit has been reset and is ready to use. Resetting the router does not reset the firmware to an earlier version, but it will change all settings back to factory defaults. Rename your Asus RT-AC68U Default Wifi Name (SSID). Some Asus routers come with default network names (with the name of the manufacturer). We recommend to use a different name because a default name unnecessarily identifies the make of your router, making it easier for attackers to break in. It's easy for a hacker to find out the manufacturer's default password for your Asus RT-AC68U router and then use that password to access your wireless network. So it's wise to change the administrator password for your Asus RT-AC68U router. When you're deciding on your new password, try to pick a complex series of numbers and letters and try to avoid using a password that can be guessed easily. MAC filtering allows you to limit access to your Asus RT-AC68U router. To enable this feature, enter into your Asus RT-AC68U router the 12-character MAC ID of each computer that will connect to your network. Be sure to update this information if you add or remove devices. Asus RT-AC68U router transmits your Wi-Fi network ID (the so-called SSID) to everyone. This may be changed at will by unchecking the corresponding box in the settings. Then your network will not be so easily hacked. However, as a compromise, you will have to enter the SSID every time that you connect a device to the network. This step is not mandatory. MAC filtering allows you to limit access to your Asus RT-AC68U router. To enable this feature, enter into your Asus RT-AC68U router the 12-character MAC ID of each computer that will connect to your network. Be sure to update this information if you add or remove devices. You wouldn't think about this at first, but where you place your Asus RT-AC68U also has a bearing on your security. Place the Asus RT-AC68U router as close as possible to the middle of your house. The first benefit is that all the rooms in your house have the same access to the Internet. The second benefit is that you don't want to have your wireless signal range reach too much outside your house, where it can be easily intercepted by cybercriminals. For this reason, don't place your Asus RT-AC68U router next to a window, since there's nothing to obstruct the signal going outside your house. 1. Connect to your wireless router via wired connection (computer cable) 2. Open your web browser and go to .When prompted, enter the router user name and password, provided on "Welcome To Spirit" letter earlier. 3. Once logged in, go to [Wireless] >> [General] and change your WiFi password in "WPA Pre-Shared" Key.We recommend to use "WPA2-Personal" authentication method, for safety. 4. Click apply to save your settings. In this article, we will show you how to reset asus wifi router and specifically mention the steps for asus rt ac68u factory reset. Resetting asus wireless router becomes easy with the simply built web-based interface. If you are searching for asus router password reset, this article has got a solution for you also. We recommend you to keep going through the steps carefully: Asus RT AC68U factory reset In this section, we will provide you the steps for Asus RT AC68U factory reset. Follow the below mentioned instructions carefully to reset asus wifi router: First of all, make sure that your computer is connected to Asus RT AC68Us wireless network. if you are not connected, you won't be able to access the web-based interface of your asus wireless router.On your computer that is connected to the wireless network, open a web browser and enter the default IP address of your asus wireless router into the address bar.You will be taken to asus wireless router login page where you will see login fields asking for router username and password. Enter the router username and password in the fields and click Login.Now, you will be navigated to asus wireless router setup page.Look for Administrative tab and click on it.You will see an option Restore Factory Settings.
